

**TWINLODE**<sup>®</sup>

Double the Throughput

## Double Your Productivity Two Pallets at a Time

TWINLODE® manufactures a unique storage system designed around the concept of loading and unloading two (2) pallets at a time.

Fabricated from heavy-duty structural steel, the patented TWINLODE double-wide design allows you to safely store your products while doubling productivity.

TWINLODE systems are utilized in many industries around the world:

- Beverage
- Agriculture (Fruits & Vegetables)
- Import/Export Facilities
- 3rd Party Logistics Centers
- Grocery
- Dairy
- Food Service
- Food Manufacturing
- Bulk Product Handling
- Petroleum, Chemicals & Paints
- and many others

## Smart Design, Big Benefits

TWINLODE systems are designed by our engineers to meet your unique application.

Our systems are designed to lower your overall material handling, storage and operating costs.

## Double & Single Pallet Storage Solutions

### Selective Rack

- Roll formed or Structural

### Drive In or Drive Through

- Unique two pallet design
- High density storage
- Double productivity
- Fewer aisles

### Pallet Flow

- Good SKU selectivity
- Ensures first-in-first-out (FIFO)
- Manages product date codes
- Pre-pick and stage shipments

### Push Back

- Reduces picking time
- Increased throughput
- Good SKU selectivity

## Case and Split Case Picking Solutions

### Case/Carton Flow

- Enhanced productivity
- Gravity flow
  - full bed skate wheel
  - wide roller

### Layer Picking Systems

- Fixed and fork mounted designs

### Pick Modules

- Design & implementation
